Sujet:	Improve user feedback of skipped file while importing		
Description			
<p>Improve user feedback for skipped files while importing.</p> <p>Some users don't see some malformed/non-valid XML files are skipped during import. The message is a few lost in the log.</p> <p>Solutions?</p> <ul style="list-style-type: none">- May improve the console log with a final summary message.- Actually, it seems important, an ending error popup may be consistent for this purpose.- general solution: error channel should appears in red in the console
