

Plateforme TXM - Bug # 3267

Statut:	New	Priorité:	Normal
Auteur:	Alexey Lavrentev	Catégorie:	UI
Créé :	28/07/2022	Assigné à:	
Mis-à-jour :	26/01/2024	Echéance:	
Sujet:	Syntactic Tree Command in Contextual Menu		
Description			
TXM version 0.8.2.202206101649 Syntatic Annotation 1.0.0.202206290953 In a corpus equipped with TIGERSearch Indexes, the "Syntactic Tree" command is available as an icon but in contextual menu the "Send To Syntactic tree" (sic) command is deactivated. The same command is available for lines in concordances (including corpora without TIGERSearch indexes). It sends the CQL query to TIGERSearch engine.			
Solution			
The RCP command was org.txm.tigersearch.command.ComputeTreeSearch and not org.txm.treesearch.command.ComputeTreeSearch			

Historique

#1 - 28/07/2022 15:10 - Serge Heiden

- *Sujet changé de Syntactic Tree Command in Contextual Menu à Syntactic Tree Command in Contextual Menu*

#2 - 28/07/2022 17:16 - Matthieu Decorde

- *Description mis à jour*
- *Version cible mis à TXM 0.8.2*
- *% réalisé changé de 0 à 80*

the RCP

#3 - 29/07/2022 11:05 - Alexey Lavrentev

- *% réalisé changé de 80 à 70*

Tested with:

TXM 0.8.2 0.8.2.202207281722

Syntatic Annotation 1.0.0.202207290855

"Send to Syntactic tree command" is available in corpus contextual menu.

Maybe change "tree" to "Tree" ?

The command is still available on concordance lines and still not working properly (it should display the tree of the sentence but it simply copies the CQL query to TIGER Search).

#4 - 09/02/2023 09:27 - Matthieu Decorde

- *Version cible changé de TXM 0.8.2 à TXM 0.8.3*

#5 - 26/01/2024 11:16 - Sebastien Jacquot

- *Version cible changé de TXM 0.8.3 à TXM 0.8.4*
