| <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                     |                   |        |
| If the 0.7.9 version is used for binary corpus export (for TXM portals), the order of editions is broken and does not correspond to the order of texts in the corpus (which remains correct). This is due to the disorder of /import/corpora/corpus/texts/text elements in the import.xml file.                                                                                                                                                        |                                                                     |                   |        |
