

Plateforme TXM - Bug # 3387

Statut:	Closed	Priorité:	High
Auteur:	Serge Heiden	Catégorie:	
Créé :	15/05/2023	Assigné à:	
Mis-à-jour :	26/01/2024	Echéance:	
Sujet:	Ubuntu, GTK, import, xtz, edition, broken accented characters in source file name		
Description			
Impossible to view edition of a corpus composed of a text named 'Stèle de Méry LouvreC3.xml'.			
See screenshot:!\ubuntu-import-xtz-edition-broken-accented-characters-in-source-file-name.png!			
Solution 1			
Pre-encode correctly the URLs given to the Webkit internal browser.			
The Java URI encoding differs from the Webkit URL encoding:			
- the space are well encoded - the accented characters are not encoded			
Solution 2			
Remove all accents from characters in source file name.			

Historique

#1 - 15/05/2023 10:44 - Serge Heiden - Description mis à jour
#2 - 16/05/2023 16:40 - Matthieu Decorde - Sujet changé de ubuntu, import, xtz, edition, broken accented characters in source file name à Ubuntu, GTK, import, xtz, edition, broken accented characters in source file name
#3 - 23/05/2023 11:03 - Matthieu Decorde - Description mis à jour
#4 - 24/05/2023 16:41 - Serge Heiden - Description mis à jour
#5 - 07/06/2023 14:25 - Matthieu Decorde - % réalisé changé de 0 à 80 Solution 1 is implemented for now
#6 - 26/01/2024 11:17 - Sebastien Jacquot - % réalisé changé de 80 à 100
#7 - 26/01/2024 11:21 - Sebastien Jacquot - Statut changé de New à Closed
