

Plateforme TXM - Feature # 3512

Statut:	Closed	Priorité:	Normal
Auteur:	Serge Heiden	Catégorie:	Diagnostic and optimization
Créé :	24/11/2023	Assigné à:	
Mis-à-jour :	26/01/2024	Echéance:	
Sujet:	add TXM version full signature to corpus "description" property		

Description

Currently the "description" corpus property only provides information about which import module was used to build the corpus.

The property value is displayed in the Corpus Properties command result in the Parameters tab, at line "description".

For example:

description: Built with the XTZ import module

This doesn't allow to diagnose some bug contexts.

Solution 1

Add TXM version full signature to corpus "description" property.

For example:

description: Built by the "XML-TEI Zero + CSV" import module with TXM 0.8.3 (2023-11-07 09h15) Linux, 5.15.0-88-generic, amd64

Solution 2

Use the "notes" line instead.
[SLH: why not "description"?]

Append the note

Built/Updated by TXM 0.8.3 (2023-11-07 09h15) with the "XML-TEI Zero + CSV" import module by <user name>(<os name>, <os version>, <os arch>)

[SLH: other format suggestion:]

Built/Updated by TXM 0.8.3 (2023-11-07 09h15) with the "XML-TEI Zero + CSV" import module by <user name> on <os name>, <os version>, <os arch>

Historique

#1 - 28/11/2023 16:39 - Matthieu Decorde

- Description mis à jour
- % réalisé changé de 0 à 80

#2 - 28/11/2023 16:43 - Serge Heiden

- Description mis à jour

#3 - 29/11/2023 14:13 - Matthieu Decorde

- Version cible changé de TXM 0.8.4 à TXM 0.8.3

#4 - 26/01/2024 11:17 - Sebastien Jacquot

- % réalisé changé de 80 à 100

#5 - 26/01/2024 11:21 - Sebastien Jacquot

- Statut changé de New à Closed
