Sujet:	VOEUX corpus, rename files with 'T' prefix		
Description			
Currently VOEUX corpus source texts are named with numerical values prefixed by '0's, to help chronological sort. But this can hamper the handling of word property exports and imports (when spreadsheets misinterpret - numerically - text names: 0001 = Integer 1 instead of String '0001'). As the VOEUX corpus is provided as an example to be used by newbies, we have to help them avoid pitfalls.			
Solution			
Rename files with 'T' prefix: '0001.txt' -> 'T0001.txt'
