

Plateforme TXM - Task # 3524

Statut:	New	Priorité:	Normal
Auteur:	Sebastien Jacquot	Catégorie:	Startup
Créé :	01/12/2023	Assigné à:	
Mis-à-jour :	01/12/2023	Echéance:	
Sujet:	Move all post-installation, first launch, etc. tasks from scripts/bat to Java/RCP		
Description			
Move all post-installation, first launch, etc. tasks from scripts/sh/bat files to Java (RCP or Core).			
Notes/Specifications [WIP SJ]			
The tasks are different for each OS. Some tasks may be can not be moved, eg. Linux R permissions. The tasks should be done in 3 fragments as we do for embedding native code or native third-party applications such R or CQP so only the specific OS tasks are delivered for a specific OS. For RCP, ApplicationWorkbenchAdvisor.preStartup() may be useful (but may be better to put the tasks at Core/Toolbox level).
