

Plateforme TXM - Task # 3529

Statut:	New	Priorité:	High
Auteur:	Serge Heiden	Catégorie:	Update
Créé :	07/12/2023	Assigné à:	
Mis-à-jour :	08/12/2023	Echéance:	
Sujet:	Update, Go past "Do you trust unsigned content of unknown origin?" Warning		
Description			
Currently TXM update dialog forces the user to select 'unsigned content of unknown origin' plugin content type to be able to update. This interface is obscure and can prevent users to be able to update TXM.			
Solution			
- a) set a sign certificate inside TXM and sign plugin updates with that certificate - Use tycho to self sign plugins&features - b) or pre-select all plugin updates to be trusted before the dialog - c) ???
