

Plateforme TXM - Feature # 3560

Statut:	New	Priorité:	Normal
Auteur:	Alexey Lavrentev	Catégorie:	Import
Créé :	22/12/2023	Assigné à:	
Mis-à-jour :	22/12/2023	Echéance:	
Sujet:	Import XTZ, enable customising the default edition name		
Description			
The default edition name should be customizable via the import module form:			
- if xslt is used to build edition, take the name(s) from the default edition field * throw an error if the xslt names do not match declared default editions			
- if facs is activated without xslt, use the name declared in the default edition field for standard TXM edition			
- if no XSLT nor facs edition, then ignore the field (the name of the edition is hidden from the user)
