<b>Sujet:</b>	Word properties annotation in Editions (annotate as you read a text Edition)		
<b>Description</b>			
Currently we can annotate word properties through:			
<ul style="list-style-type: none"><li>- Concordances</li><li>- some Utilities like CQL2WordAnnotations</li></ul>			
It would be very helpfull to have a similar way as in the URS extension to annotate as you read a text Edition.			
<b>Solution</b>			
<ul style="list-style-type: none"><li>- a) build a similar UI as in the URS Edition Annotation plugin, each field corresponding to a word annotation</li><li>- b) or build as simlar UI as in the Concordance, each property correspond to a word annotation toolbar</li></ul>			
There must be a visual feedback for each new annotation.
